

EXPERIENCE PROGRESS

The **Pitts21 PRO** Self-Ligating Bracket System delivers consistent results using the most evolutionary self-ligating bracket technology. With improved early 3D control of torque, tip and rotation, **Pitts21 PRO** reduces treatment time helping you deliver beautiful finishes faster.

Pitts21[®] PRO

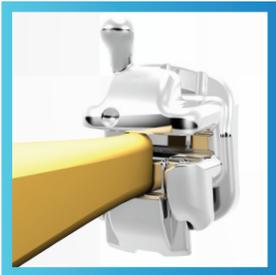

Self-Ligating Bracket System

Smooth, Rounded Edges

Ensures that your patients have the most comfortable experience.

Unique Door Design

The unique ligation system provides reliability and easy operation. Easily opened with a twist using our Quick-Turn Tool and closed with a gloved finger.

QUICK-TURN Opening Tool

Integrated Hooks

An available option on the 3's, 4's and 5's for your convenience at no extra charge.

Scribe Lines

Permanent identification for easy bracket to tooth identification.

.021 Precision Slot Depth

The reduced slot depth provides a tighter pairing between the wire and the bracket leading to earlier engagement, improved torque, and better control.

Large Under Tie-Wing Clearance

Supports early elastics, ligatures, metal ligatures, and power chain.

REDEFINING OF THE USER EXPERIENCE

POWERFUL BENEFITS

Designed to Reduce Treatment Time

Improved early 3D control of torque, tip and rotation aims to reduce treatment time

Latest in Technology

Square wire finishing uses 30-40% lighter forces* with greater control than traditional rectangular wire

Control and Finishing

True 3D control in as few as 4 wires promotes efficient tooth movement and predictable finishes

Stunning Smiles

Pitts active early protocols enable you to create the most stunning smiles

**Horizontal and vertical forces; compared to rectangular systems*

Pitts21[®] PRO

EXPERIENCE PROGRESS

The **Pitts21 PRO** Self-Ligating Bracket System is the next evolution in self-ligating systems. Designed to make your practice more profitable, productive, and progressive. The Pitts21 PRO's proprietary square slot system obtains engagement earlier while producing gentle forces that are biologically active. Match it with the **Clear21** for a complete functional and aesthetic system.

PROFITABILITY

The **Pitts21 PRO** increases your clinical efficiencies with precise control, earlier engagement, and amazing finished results. These system benefits can result in less appointments, less chair time, less detailing, less wires, and faster treatment time resulting in greater profit margins.

PRODUCTIVITY

The **Pitts21 PRO** is designed to efficiently reduce treatment time and provide 3D control earlier and throughout treatment. The proprietary square slot allows engagement earlier with lighter forces than rectangular slotted systems.

PROGRESSIVE

Traditional passive self-ligation brackets and wires have significant play, resulting in poor control, manual adjustments, and extended treatment time. The progressive **Pitts21 PRO** and Pitts Protocols offer a more efficient system that uses a single prescription to deliver predictable early rotational control, angulation, and torsion. The final result is beautiful "**Wow Worthy**" aesthetic smiles.
